

# VEHICLE / FLEET MONITORING & FUEL THEFT PREVENTION SYSTEM

Receive an SMS when fuel is being stolen

Fuel costs can account for one-third of all fleet operation costs. For fleet to be effective and achieve maximum profitability a continuous fuel monitoring and control solution is a must. ENTMAX fuel monitoring and control solution provides companies with detailed fuel information and enables them to control and optimize their fuel costs by controlling theft.

## Salient Features:

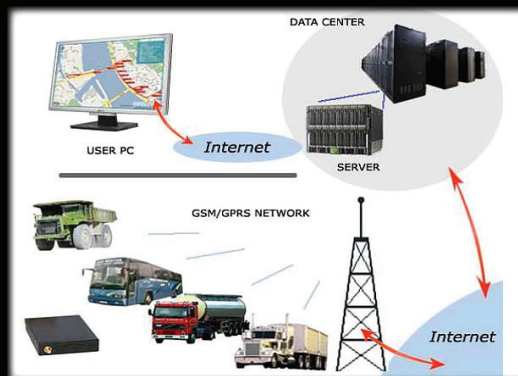

- Remote vehicle tracking & monitoring
- Automatic alert on fuel theft detection via SMS
- 3G Enabled GPRS/GSM Communication link
- Remote Fuel consumption monitoring
- Automatic camera photo of theft events\*
- Monitors accidental fuel drainage
- Centralized monitoring of entire fleet
- Applicable to various vehicle types including Trucks, tractors, bulldozers, vans, trailers etc.
- Long-term durable solution
- Customized monitoring software\*\*

\* Subject to availability of specific controllers. \*\* At additional cost

## Automatic camera capture

## Concept of Operation

## High-tech tank sensor

## Multiple tank support

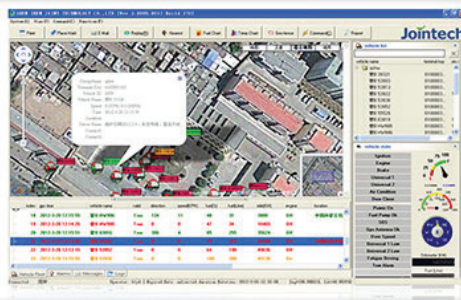

## Advanced controller

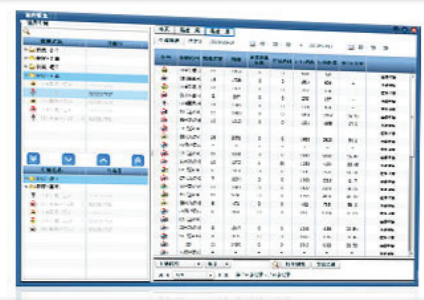

## Abnormal alarm generation

## Real-time oil level monitoring

## Fuel consumption reports

# PREVENT FUEL THEFT IMPROVE ROI

Fuel theft is a growing and pervasive problem worldwide and there are countless remedies that only reduce the risk and fails to be tailored for customers' specific needs. Our telematics GPS tracking devices are specifically configured with the function and industry in mind for each machinery, equipment, or vehicle.

The solution to prevent and stop fuel theft begins by tackling in-house fuel theft. The combination of our GPS devices and fuel-tracker will let you know the location of each refill and an estimate of how much was filled in the tank.

Moreover, should your vehicle be directly siphoned, you can be immediately notified by email or text message (SMS) and sound off

## Benefits

-  Improve fleet efficiency & profitability
-  Promote green environment protection
-  Improves staff's satisfaction
-  Reduce management cost
-  Reduce maintenance cost
-  Reduce responsibilities & risks
